PROFESSIONAL LICENSURE DISCLOSURE

South College offers several programs leading to professional licensure within the State of Tennessee. Several programs leading to professional licensure are also offered in Georgia, Florida, Indiana, and Pennsylvania. Several graduate programs/courses are offered in an online/hybrid format and students may live in a variety of states. States vary in what professions they require to be licensed and how licensure functions, with some states requiring only registration. Some states require an individual to graduate from an approved or accredited program. Others require an individual to "meet [the] certification requirements of a national organization." A specific amount of training can also be required, as well as successful passing of an exam based on a nationally required exam score. It is not uncommon that professionals must complete continuing education on an annual or otherwise basis.

South College is an institutional participant in the National Council for State Authorization Reciprocity Agreements (SARA). SARA is an agreement among member states, districts, and territories that establishes comparable national standards for interstate offering of post-secondary distance education courses and programs. It is intended to make it easier for students to take online courses offered by post-secondary institutions based in another state. SARA covers all interstate placements in clinical or practica situations among SARA member states, no matter the nature of the main program. However, some such placements may also be subject to the rules of professional licensing boards, in which case the placement must also meet such requirements. For the most current information regarding the members of SARA, please visit the below: http://nc-sara.org/stateactions/state-actions-regarding-sara. For more information about SARA, please visit http://www.nc-sara.org/.

Important Note for Prospective Students: If considering an academic program that leads to a professional license in your planned state of residence, it is highly recommended that you first seek guidance from the appropriate licensing agency in that state BEFORE beginning the academic program located outside that state. It is the student's responsibility to contact the appropriate licensing board to confirm whether a South College program will meet the requirements for licensure in that state. South College will assist with this information. For onground/hybrid programs, the institution ensures that the program meets requirements for the state in which the campus is located.

Important note for students interested in pursuing School of Education programs: Educator licensure and certification are regulated individually by State Departments of Education. Students who seek admission to any School of Education program should contact their home state's Department of Education for applicable requirements rules and regulations. Students are responsible for determining whether the South College program will meet their home states' requirements for certification, licensure, or other credential.

RELOCATION TO ANOTHER STATE - Students who consider moving to another state during their enrollment at South College must consult with their academic advisor and the financial aid department prior to this move in order to discuss the consequences of this move. Consideration of these consequences is very important and could include loss of eligibility for federal student aid or, if applicable, rescheduling of clinical or other rotations if the move is to a state in which the institution is not authorized. It is the student's responsibility to contact the appropriate licensing board in his/her home state to confirm whether a South College program will meet the requirements for licensure in that state.

LICENSING DISCLOSURES

34 CFR 668.43(a)(5)(v) Professional Licensure/Certification (PLC) pre-education requirements

The South College curricula for programs normally leading to licensure in identified states have been designed to meet the licensure/certification requirements in the states in which programs are located, as well as preparing students to apply for certification exams required for licensure. The licensure boards in each state are responsible for establishing the requirements for licensure/certification for their state. Students must review the professional licensure disclosures pertaining to their program and consult with the state professional licensing board. The state

professional licensing boards make the final decision as to whether or not an individual is eligible for licensure based on the requirements in place at the time the application for licensure is submitted.

Some state licensing boards require additional items outside of education, which may include, but are not limited to, additional examinations or experience, payment of associated fees, criminal background checks, reference checks, fingerprint submissions, drug screen, evidence of specific content such as ethics or completion of required course, etc. Continuing education may also be required to maintain certification/licensure. Students must make certain to review and understand any additional requirements prior to enrolling in a program.

State licensing requirements are always subject to change at the discretion of the state agency. South College will routinely update this page, but students are strongly recommended to contact the applicable state board to confirm eligibility for licensure prior to enrolling in a program.

Licensing requirements vary by state/territory and relocating could impact eligibility requirements for licensure. For any questions about relocation eligibility, contact the agency in the state in which licensure is desired prior to relocating to ensure eligibility for licensure or reciprocity. Carefully review the educational prerequisites for the intended state/territory of licensure and whether the program meets those requirements for licensure. Use the agency contact information provided below to clarify or confirm any requirements. If questions remain after reviewing the information provided below, contact the program advisor.

To the best of the ability of South College, the information below indicates if the program curriculum Meets the requirements in the identified states and US Territories, Does NOT Meet the requirement in these states and US Territories, or Undetermined if the program has not yet determined if the curriculum requirements are met for these states and US Territories.

The below information was updated as of requirements published as of May 2025.

Doctor of Pharmacy

Pharmacists must be licensed by the state in which they intend to practice. Licensure laws and regulations for Pharmacists vary from state to state. Statutory and regulatory requirements for initial licensure and license renewal can be found at each state's Board of Pharmacy website. A reference for each state Board of Pharmacy is available at the National Association of Boards of Pharmacy (NABP) website located here – https://nabp.pharmacy/about/boards-of-pharmacy/. In general, the North American Pharmacist Licensure Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE) are required prior to licensure. Exceptions to this can be found here – https://nabp.pharmacy/programs/mpje/. Graduation from an ACPE-accredited program is a requirement for licensure in all 50 states and U.S. jurisdictions. The South College School of Pharmacy program is accredited by ACPE. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Students participating in clinical learning experiences outside of Tennessee must comply with each state's rules for intern licensure. The South College School of Pharmacy Office of Clinical Education requires that students attain intern licensure prior to any out of state learning experiences. Information on intern licensure requirements can be found at each state's Board of Pharmacy website.

South College has not determined whether completion of the Doctor of Pharmacy (PharmD) program meets educational requirements to apply for registration or licensure as a pharmacist in other Pacific territories.

Doctor of Physical Therapy (DPT)

The Doctor of Physical Therapy Program is a professional doctoral program preparing graduates for licensure in all states and several US territories following passing of the NPTE exam and completion of any state-specific juris prudence examination. The program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) which is recognized by the US Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA).

Licensure as a Physical Therapist is regulated by the Federation of State Boards of Physical Therapy while individual states are typically overseen by a State Board of Physical Therapy. All 50 states and several US territories require graduation from a CAPTE accredited program, as well as passing the NPTE in order to obtain a license and practice as a Physical Therapist. The South College DPT program in Knoxville is a CAPTE accredited program, and the programs at the Atlanta and Nashville campuses are candidates for accreditation. The programs aim to prepare graduates to sit for the National Physical Therapy Examination (NPTE). We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score. Some states have unique additional licensure requirements. For example, a jurisprudence exam is required in some states to test the graduate's knowledge of state laws, rules, and practice acts that govern physical therapy practice. Some require additional satisfactory background checks. These unique requirements are not associated with preparation in the South College program. The following link provides contact information for individual state licensing authorities: https://www.fsbpt.org/FreeResources/LicensingAuthoritiesContactInformation.aspx. Individuals should review requirements for the desired state or territory PRIOR to beginning the South College program.

Doctor of Nursing Practice w/Concentration Nurse Anesthesia Certificate in Nurse Anesthesia (Post-DNP)

The South College DNP Nurse Anesthesia Program (NAP) is a Council on Accreditation of Nurse Anesthesia Educational Programs (COA) accredited program which aims to prepare graduates to sit for the National Certification exam (NCE). The Council on Accreditation of Nurse Anesthesia Educational Programs (COA) is nationally recognized by the U.S. Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA) as an accrediting agency for the "accreditation of institutions and programs of nurse anesthesia at the post-master's certificate, master's, or doctoral degree levels in the United States, and its territories, including programs offering distance education."

Licensure as a Certified Registered Nurse Anesthetist (CRNA) is regulated by individual states and is overseen by State Boards of Nursing. All 50 states require graduation from a COA accredited program and a passing score on the National Certification Exam (NCE) to obtain licensure and practice as a CRNA. The NCE is administered by the National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA). Further information regarding the NCE can be obtained at https://www.nbcrna.com/initial-certification. The South College DNP Nurse Anesthesia Program (NAP) is a COA accredited program which aims to prepare graduates to sit for the NCE; however, graduation from the DNP NAP does not guarantee a passing score on the NCE. Some states have unique licensure requirements; these unique requirements are not associated with preparation in the South College DNP Nurse Anesthesia Program and must be met by the graduate. Information on individual state licensing requirements may be obtained at https://www.ncsbn.org/14730.htm.

Doctor of Occupational Therapy

The Doctor of Occupational Therapy program is a professional doctoral program preparing graduates for licensure in all states and several US territories following passing of the NBCOT exam. The program has received Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) which is recognized by the US Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA). The program must have a preaccreditation review, complete an on-site evaluation, and be granted Accreditation Status before graduates are eligible to sit for the National Board for Certification in Occupational Therapy (NBCOT).

All 50 states and several US territories require graduation from an ACOTE accredited program, as well as passing the NBCOT in order to obtain a license and practice as an Occupational Therapist.

The South College programs aim to prepare graduates to sit for the NBCOT exam. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score. Some states have unique additional licensure requirements. For example, a jurisprudence exam is required in some states to test the graduate's knowledge of state laws, rules, and practice acts that govern physical therapy practice. Some require additional satisfactory background checks. These unique requirements are not associated with preparation in the South College program. Individuals should review requirements for the desired state or territory PRIOR to beginning the South College program.

Master of Education in Elementary Education (K-5) Initial Licensure Bachelor of Science in Elementary Education (K-5)

The Tennessee State Board of Education approves the South College School of Education to offer elementary education programs that leads to the initial TN Elementary Education K-5 license. Bachelor's and Master's Elementary Education Initial Licensure students will be recommended for licensure in Elementary Education K5 to the Tennessee State Department of Education only after being admitted to the Teacher Education Program, completing the required coursework, passing Tennessee's licensure assessments, and completing student teaching.

The South College School of Education only recommends students for licensure in the state of Tennessee.

Any individual desiring licensure in a state different from Tennessee, or any currently TN licenses teacher who desires to transfer his/her license to another state, should contact the Board of Education for that state.

South College School of Education Contact: Michelle Barnett, EdD

Master of Science in Nursing
Post-Graduate Certificates

- **Adult-Gerontology Acute Care Nurse Practitioner**
- **Family Nurse Practitioner**
- **Nurse Executive**
- **Pediatric Nurse Practitioner**
- **Psychiatric-Mental Health Nursing Practitioner**

The South College MSN and Post-Graduate Certificate programs are Commission on Collegiate Nursing Education (CCNE) accredited programs which aim to prepare graduates to sit for associated National Certification exams (NCE). CCNE is nationally recognized by the U.S. Department of Education (USDE) as an accrediting agency for the "accreditation of nursing education programs in the United States, at the baccalaureate, master's, doctoral and certificate levels, including programs offering distance education."

Registered nurses must be licensed by the state in which they intend to practice. Licensure laws and regulations vary from state to state. In order to be admitted to the South College MSN program, applicants must provide evidence of a current unencumbered Registered Nurse license or in progress of becoming licensed as a Registered Nurse as verified by Nursys (https://www.nursys.com) or licensure verification system provided by individual State Boards of Nursing. Additional licensure may be required if practicum courses are completed in a state other than the state where the student already holds licensure.

Graduates of the MSN w/Concentration in Adult-Gerontology Acute Care Nurse Practitioner and Certificate in Adult-Gerontology Acute Care Nurse Practitioner (Post-Graduate) programs will meet the requirements to sit for Consensus Model-based ACNPC-AG certification exam administered by the American Association of CriticalCare Nurses (AACN) or the American Nurses Credentialing Center (ANCC).

Graduates of the MSN w/Concentration in Nurse Executive and Certificate in Nurse Executive (Post-Graduate) programs may seek Nurse Executive board certification from The American Nurses Credentialing Center (ANCC) or The American Organization for Nursing Leadership (AONL) provided that they meet the practice requirements. Requirements for certification include varying combinations of requirements depending upon the certification sought but generally include requirement to hold a current RN license, minimum educational level in nursing, specified time/hours of experience in nursing management/supervision, and continuing education credits if a master's degree has not been earned.

Graduates of the MSN w/Concentration in Family Nurse Practitioner (FNP) and Certificate in Family Nurse Practitioner (Post-Graduate) programs will meet the requirements to sit for the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners (AANP) FNP national certification examination.

Graduates of the MSN w/Concentration in Pediatric Nurse Practitioner and Certificate in Pediatric Nurse Practitioner (Post-Graduate) programs will meet the requirements to sit for the Pediatric Nursing Certification Board (PNCB) PNP national certification examination.

Graduates of the MSN w/Concentration in Psychiatric/Mental Health Nurse Practitioner and Certificate in Psychiatric-Mental Health Nurse Practitioner programs will meet the requirements to sit for the American Nurses Credentialing Center (ANCC) PMHNP certification examination and American Academy of Nurse Practitioners (AANP) PMHNP examination.

We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Master of Health Science in Physician Assistant Studies

The South College MHS in Physician Assistant Studies programs are approved by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) – Knoxville/Atlanta (AccreditationContinued), Nashville (Accreditation-Provisional), and Asheville-Provisional). The ARC-PA is recognized by the Council for Higher Education Accreditation (CHEA) as an accrediting agency for "programs preparing individuals for entry into PA practice located in institutions in the US that are accredited by recognized regional accrediting bodies."

PAs must be licensed by the state in which they intend to practice before seeing patients. State laws and regulations for Physician Assistants vary from state to state. Statutory and regulatory requirements for initial licensure and license renewal for each state can also be found via this link - https://www.aapa.org/download/19739/. Graduation from an ARC-PA accredited program meets initial licensure requirements for all states and the passing of the PANCE national certification exam is required. Another resource is https://www.nccpa.net/become-certified. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Master of Science in Speech Language Pathology
The South College Master of Science in Speech Language Pathology program prepares graduates to pursue professional licensure as speech-language pathologists and the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) awarded by the American Speech-Language-Hearing Association (ASHA). The program combines online academic coursework, clinical simulation, and three full-time, in-person clinical practicums in a variety of settings. Clinical education is coordinated by the program and supervised by ASHA-certified, state-licensed speech-language pathologists who meet applicable supervision requirements.

The program holds Candidate for Accreditation status from the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of ASHA, 2200 Research Boulevard #310, Rockville, MD 20850; 800-498-2071 or 301-296-5700. CAA awarded candidacy on May 28, 2026. Candidacy is a preaccreditation status for developing programs and should be identified accurately in all program disclosures. ASHA certification standards accept required graduate coursework and clinical experience initiated and completed in a CAA-accredited program or a program holding CAA candidacy.

ASHA certification and state licensure are separate credentials. Graduation does not automatically confer either credential or authorize independent practice. Applicants for the CCC-SLP must satisfy the applicable degree, coursework, knowledge and skills, supervised clinical practicum, national examination, clinical fellowship, and application requirements. A clinical fellowship follows completion of the required graduate academic and clinical preparation. ASHA's 2027 certification standards take effect August 1, 2027; students should consult ASHA to confirm the standards and transition provisions applicable to their application.

Each state establishes its own requirements for professional practice. In addition to education and graduate clinical preparation, requirements may include a passing national examination score, supervised postgraduate professional experience, ASHA certification, a jurisprudence examination, background screening, required training, fees, and other application conditions. Graduates may need a temporary, provisional, limited, or other authorization before beginning postgraduate supervised practice. The state licensing authority makes the final decision on an individual application.

The table below addresses the educational requirements for the professional speech-language pathology license or equivalent state credential. It does not establish eligibility for a separate school services or educator credential, an early intervention credential, audiology licensure, or speech-language pathology assistant licensure. School and early intervention settings may impose additional requirements. Applicants should review the requirements in the jurisdiction where they intend to practice before enrollment and again before applying for licensure.

Bachelor of Science in Nursing Associate of Science in Nursing Certificate in Practical Nursing

The South College Bachelor of Science in Nursing program offered at the Parkside Learning Site (Knoxville) received initial approval from the Tennessee Board of Nursing in December 2003, with full approval granted in September 2008. Approval for the addition of the Nashville Learning Site was granted in November 2016. The South College Bachelor of Science in Nursing program offered at the Asheville Learning Site received initial approval from the North Carolina Board of Nursing in February 2016, with full approval granted in May 2019. The Bachelor of Science in Nursing program offered at the Atlanta Learning Site received initial approval from the Georgia Board of Nursing in September 2018 and fill approval was granted in September 2022. The Bachelor of Science in Nursing program offered at the Orlando Learning Site received initial approval from the Florida Board of Nursing in November 2021. The Bachelor of Science in Nursing program offered at the Indianapolis campus received initial approval from the Indiana Board of Nursing in July 2022. The Bachelor of Science in Nursing program offered at the Pittsburgh campus received initial approval from the Pennsylvania Board of Nursing in April 2023.

The South College Associate of Science in Nursing program (Knoxville & Nashville Learning Site) was approved by the Tennessee Board of Nursing in November 2022. The Associate of Science in Nursing program offered at the Orlando Learning Site was approved by the Florida Board of Nursing in January 2023. The Associate of Science in Nursing program offered at the Atlanta Learning Site was approved by the Georgia Board of Nursing in March 2023. The Associate of Science in Nursing program offered at the Pittsburgh Learning Site was approved by the Pennsylvania Board of Nursing in November 2023.

The South College Certificate program in Practical Nursing offered at the Parkside Learning Site (Knoxville) received approval from the Tennessee Board of Nursing in February 2018. Approval for the addition of the Nashville Learning Site was granted in November 2018. The Certificate program in Practical Nursing was approved by the Georgia Board of Nursing for the Atlanta Learning Site in May 2019 to begin the first class in June 2020. The Certificate program in Practical Nursing was approved by the Florida Board of Nursing for the Orlando Learning Site in November 2021. The Certificate program in Practical Nursing was approved by the Pennsylvania Board of Nursing for the Pittsburgh Learning Site in March 2023. The Certificate program in Practical Nursing was approved by the North Carolina Board of Nursing for the Asheville Learning Site in May 2023. The Certificate program in Practical Nursing at the Indianapolis campus received initial approval from the Indiana Board of Nursing in July 2023.

Individual State Boards of Nursing uses the National Council Licensure Examination (NCLEX®) prepared by National Council of State Boards of Nursing (NCSBN) to measure competence for entry-level practice for graduates of pre-licensure nursing education programs. Professional nurses are prohibited in all states from practicing nursing until the NCLEX® examination is successfully completed and licensure has been granted. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Upon completion of degree requirements, each student enrolled in the BSN, ASN, PN programs must make application to sit for the National Council Licensure Examination (NCLEX-RN for BSN and ASN and NCLEXPN for Certificate PN). Professional nurses are prohibited in all states from practicing nursing until the examination is successfully completed and licensure has been granted. Specific information regarding licensure will be provided to the student during the last quarter of the nursing program. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

State Boards of Nursing have the responsibility and right to deny licensure to persons who have been convicted of a crime other than a minor traffic violation. Persons having a criminal record should consult the Rules and Regulations of the applicable state Board of Nursing.

The "SAVE Act" requires Tennessee Department of Health (including all Boards, Commissions, and contractors), along with every local health department in the State, to verify that every adult applicant for a professional license is either a U.S. citizen, a "qualified alien," or a nonimmigrant who meets the requirements set out at 8 U.S.C. 1621. For more information, please visit http://www.tn.gov/health/article/nursingapplications.

For more detailed information about the NCLEX, please visit the website of National Council of State Boards of Nursing at http://www.ncsbn.org.

US Virgin Islands	Virgin Islands Board of Nurse Licensure https://vibnl.vi.gov/	Law passed for Compact, Awaiting Implementation

Note: Tennessee, North Carolina, Georgia, Florida, Indiana, and Texas are Compact States. Graduates may seek licensure in these states and apply for a multistate license with other Compact States. Many states that are not Compact States have provision to apply for licensure by endorsement. Gaining Tennessee, North Carolina, Georgia, Florida, Texas, or Indiana licensure is the foundation for applying in this manner. The BSN, ASN, and PN programs are approved in Pennsylvania – pending implementation of Compact legislation. Other states also have pending Compact legislation.

Bachelor of Science in Health Science w/Concentration Computed Tomography
Certificate in Computed Tomography

These programs are designed to prepare graduates to sit for the American Registry of Radiologic Technologists (ARRT) and/or the Nuclear Medicine Technology Certification Board (NMTCB) post-primary Computed Tomography (CT) certification examination.

According to the American Society of Radiologic Technologists (ASRT), states that have established requirements for the performance of Computed Tomography (may not be licensure) are Arizona, California, Colorado, Florida, Massachusetts, Michigan, Nevada, New Mexico, North Carolina, Oregon, Tennessee, Vermont, and Wisconsin. These requirements may vary from state to state. Statutory and regulatory requirements can be found at each state's board website. Passing of the certification exam is normally required in order to apply for state license. Even in states where licensure or requirements have not been established, many employers require evidence of certification. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Bachelor of Science in Electrical Engineering Technology

The South College BS in Electrical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and Program Criteria for Electrical/Electronics Engineering Technology and Similarly Named Programs.

Students graduating from the South College BS in Electrical Engineering Technology program are eligible to attempt the Fundamentals of Engineering (FE)Certification exam.

Graduates of the program are not eligible to apply for licensure as an Electrical Engineer. Passing the FE exam is an essential first step, but the typical four-step process in the US is:

Step	Description
1. Pass FE Exam	Become an Engineer-in-Training (EIT) or Engineering Intern (EI)
2. Gain Work Experience	Usually **4 years** of experience under a licensed PE
3. Pass PE Exam	Take and pass the Principles and Practice of Engineering (PE) exam in Electrical Engineering
4. Apply for Licensure	Submit application and documentation to your **state board of licensure**

Bachelor of Science in Health Science w/Concentration in Diagnostic Medical Sonography

Associate of Science in Diagnostic Medical Sonography (Abdominal sonography-extended and obstetrics and gynecology sonography concentration or Adult Echocardiography sonography concentration**)**

Students successfully completing the Associate of Science degree program in Diagnostic Medical Sonography or the Bachelor of Science in Health Science w/Concentration in Diagnostic Medical Sonography are eligible to apply for admission to write the certification examination administered by the American Registry of Diagnostic Medical Sonography (ARDMS). Successful completion of the ARDMS examinations provides certification to practice as a registered sonographer in most states.

According to the American Society of Radiologic Technologists (ARRT), states that have established requirements for the performance of Sonography (may not be licensure) are New Hampshire, New Mexico, North Dakota, and Oregon. It's important to note that while these four states have formal licensure requirements, other states may have varying regulations or employer-specific certification expectations. For instance, some employers might require national certification through organizations like the **American Registry for Diagnostic Medical Sonography (ARDMS)**, even in the absence of state mandates.

These requirements may vary from state to state. Statutory and regulatory requirements can be found at each state's board website. Passing of the certification exam is normally required in order to apply for state license. Even in states where licensure or requirements have not been established, many employers require evidence of certification. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Bachelor of Science in Health Science w/Concentration in Magnetic Resonance Imaging
Certificate in Magnetic Resonance Imaging

Students successfully completing the Certificate in MRI are eligible to apply for admission to write the certification examination administered by the American Registry of Radiologic Technologists (ARRT). Successful completion provides certification to practice as a registered MRI technologist.

According to the American Society of Radiologic Technologists (ARRT), states that have established requirements for the performance of MRI (may not be licensure) are New Hampshire, New Mexico, North Dakota, Oregon, Tennessee, and West Virginia. These requirements may vary from state to state. Statutory and regulatory requirements can be found at each state's board website. Passing of the certification exam is normally required in order to apply for state license. Even in states where licensure or requirements have not been established, many employers require evidence of certification. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Bachelor of Science in Health Science w/Concentration in Nuclear Medicine
Associate of Science in Nuclear Medicine
Certificate in Nuclear Medicine

Upon successful completion of the BS Health Science w/Concentration in Nuclear Medicine or the Certificate in Nuclear Medicine program, the graduate is eligible to apply for admission to write for the certification examination of the Nuclear Medicine Technology Certification Board (NMTCB). Students/graduates convicted of a misdemeanor or felony may be excluded from clinical and from sitting for certification exams.

Not all states require licensure in this area, however evidence of certification is normally required.

According to the American Society of Radiologic Technologists (ARRT) and the Society of Nuclear Medicine & Molecular Imaging (SNMMI), states that have established requirements for the performance of Nuclear Medicine (may not be licensure) are Arizona, Arkansas, California, Delaware, Florida, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Mississippi, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Ohio, Oregon, Rhode Island, South Carolina, Texas, Utah, Vermont, Virginia (Out-Patient), West Virginia, Wyoming, and Puerto Rico. These requirements may vary from state to state. Statutory and regulatory requirements can be found at each state's board website. Passing of the certification exam is normally required in order to apply for state license. Even in states where licensure or requirements have not been established, many employers require evidence of certification. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Associate of Science in Dental Hygiene

The South College AS in Dental Hygiene program is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education.

Licensure is granted by each individual state. Dental Hygienists practice in accordance with requirements of individual state dental practice acts.

In virtually every state, several steps are required before a license can be granted:

- Graduation from an accredited Dental Hygiene program
- Successful completion of the written National Board Dental Hygiene Examination
- Successful completion of a regional or state clinical board examination
- Successful completion of the Dental Anesthesia Certification Course within the program
- Successful completion of the Nitrous Oxide Monitoring and Administration Certification Course within the program

We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

As licensing requirements vary from state to state, it is necessary to contact each licensing authority in a given state for its specific application requirements and procedures.

Typically, state boards have the authority to deny a license to an applicant who has committed an act for which the board could revoke a license. Persons convicted of a felony or serious misdemeanor may be refused licensure, as well as those disciplined on the license application about prior convictions, discipline, etc. Most states conduct background checks on a case-by-case basis and may take into consideration the seriousness of the offense and other factors in making the decision to grant or withhold licensure.

Associate of Science in Occupational Therapy Assistant

The South College OTA programs are ACOTE-accredited programs which aim to prepare graduates to sit for the NBCOT certification examination.

All states, the District of Columbia, Puerto Rico, and Guam require occupational therapy assistants to be licensed. All state occupational therapy regulatory agencies have several core licensing requirements. The core licensing requirements includes graduation from an ACOTE accredited educational program, completion of fieldwork requirements, and passing the National Board for Certification in Occupational Therapy (NBCOT) Examination, along with the completion of an initial license application and paid associated fee for each state or jurisdiction the person wishes to practice or hold a license. Additional state licensure requirements may vary and can include required satisfactory background checks or a jurisprudence exam to test the graduate's knowledge of state laws, rules, and practice acts that govern occupational therapy practice. These unique requirements are not associated with preparation in the South College program. Students convicted of a felony or misdemeanor may be excluded from field experiences and/or taking the certification examination. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Associate of Science in Physical Therapist Assistant

Licensure as a Physical Therapist Assistant is regulated by the Federation of State Boards of Physical Therapy while individual states are typically overseen by a State Board of Physical Therapy. All 50 states require graduation from a CAPTE accredited program, as well as passing of the NPTE-PTA, in order to obtain a license and practice as a Physical Therapist Assistant. The South College PTA programs are accredited or in pursuit of accreditation from CAPTE with the aim to prepare graduates to sit for the National Physical Therapy Examination (NPTE-PTA). Some states have unique licensure requirements. For example, a jurisprudence exam is required in some states to test the graduate's knowledge of state laws, rules, and practice acts that govern physical therapy practice (this is currently required in Georgia and North Carolina but not in Tennessee). Some require satisfactory background checks. These unique requirements are not associated with preparation in the South College program. The following link provides contact information for individual state licensing authorities: https://www.fsbpt.org/Free-Resources/Licensing-Authorities-Contact-Information. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

Associate of Science in Respiratory Therapy

The Respiratory Therapy program is an associate degree program preparing graduates for licensure in required states and several US territories following passing of the NBRC exam. The program is pursuing accreditation by the Commission on Accreditation for Respiratory Care which is recognized by the US Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA). Licensure as a Respiratory Therapist is regulated by individual states with the exception of Alaska - 49 states and several US territories require graduation from a CoARC accredited program, as well as passing the NBRC exam (CRT or RRT state specific) in order to obtain a license and practice as a Respiratory Therapist. The South College Respiratory Therapy program aims to prepare graduates to sit for the National Board for Respiratory Care Examination (NBRC). We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score. Some states have unique additional licensure requirements. The following link provides contact information for individual state licensing authorities:
https://www.aarc.org/wp-content/uploads/2020/10/respiratory-care-practice-law-by-state.pdf

Individuals should review requirements for the desired state or territory PRIOR to beginning the South College program. South College is currently in the process of seeking CoARC accreditation for a respiratory care program. However, South College can provide no assurance that accreditation will be granted by the CoARC. Once CoARC accreditation is granted, completion of the Associate of Science Respiratory Therapy (ASRT) program meets educational requirements to apply for registration or licensure as a respiratory therapist in each of the 49 states requiring licensure (except Alaska).

Associate of Science in Surgical Technology

Currently there are no requirements for state licensure for Surgical Technologists. Professional certification is required to practice as a Surgical Technologist. The National Board of Surgical Technology and Surgical Assisting currently sets certain eligibility criteria to take the surgical technology certification exam. Graduates of an accredited program in surgical technology or surgical first assisting programs can take the exam with a notarized letter from their program director stating their graduation date, with a copy of their transcript. We work diligently with all students in preparation for licensure/certification examinations, however, graduation does not guarantee a passing score.

The Associate of Science in Surgical Technology program offered at the Knoxville and Asheville campuses is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) (25400 U.S. Highway 19 North, Suite 158, Clearwater, FL 33763, 727-210-2350), based upon the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC-STSA).

The application and self-study for the Associate of Science in Surgical Technology program offered at the Atlanta, Indianapolis, Nashville, Orlando, and Pittsburgh campuses to the Commission on Accreditation of Allied Health Education Programs (www.caahep.org, 9355 – 113th St. N, #7709, Seminole, FL 33775, 727-210-2350) has been submitted and a site visit scheduled for pursuing initial accreditation by the Commission on Accreditation of Allied Health Education Programs. This step in the process is neither a status of accreditation nor a guarantee that accreditation will be granted. Accreditation must be awarded to the program prior to graduates being able to attempt the required certification examination to practice as a Surgical Technologist."

State Law Overview
The following states have passed laws related to the education and certification of surgical technologists. This includes graduation from a CAAHEP-accredited surgical technology program, obtain the Certified Surgical Technologist (CST®) credential from the National Board of Surgical Technology and Surgical Assisting (NBSTSA), and maintain the CST® credential by completing mandatory continuing education (CE) hours.

NOTE: When a state passes this law, nothing in the law prevents an employer from requiring all of its surgical technologist employees (not just new-hires) to meet the full requirements of the law regardless of whether the employee fits into the “grandfathered” or “military” exceptions.

Indiana (2009)
Massachusetts (2012)
Nevada (2017)
New Jersey (2011)
New York (2015)
Oregon (2016)
Pennsylvania (2020)
South Carolina (2018) Tennessee
(2013)
Texas (2009)
Idaho (1991) – Idaho has an administrative rule requiring that surgical technologists (referred to as “operating room technicians” in the rule) either complete a CAAHEP-accredited program OR satisfy the NBSTSA requirements for CST/certification.

The following states require surgical technologists to register in order to work in the state:
Colorado (2016) (CST not required for registration)
North Dakota (2011) (“Unlicensed Assistive Person” registry; CST not required for registration) Washington (2010) (CST not required for registration)

The following states offer optional registration/title protection for surgical technologists: Arkansas (2017) (Must be a CST in order to qualify for the registry/title protection)
Illinois (2004) (Must be a CST in order to qualify for the registry/title protection)
Virginia (2014) (Must be a CST in order to qualify for the registry/title protection)

Certificate in Dental Assisting

The Certificate in Dental Assisting program offered at South College is accredited by the Commission on Dental Accreditation (CODA).

Dental Assistants practice in accordance with the requirements of individual State Dental Practice Acts. In some states, Dental Assistant registration is required. The South College Dental Assisting graduate will be eligible for registration by the Board of Dentistry and may perform additional procedures for which they have received Board certification including:

- Coronal Polishing
- Nitrous Oxide Monitoring
- Sealant Application
- Dental Radiology

As licensing requirements vary from state to state, it is necessary to contact each licensing authority in a given state for its specific application requirements and procedures. Typically, state boards have the authority to deny a license to an applicant who has committed an act for which the board could revoke a license. Persons convicted of a felony or serious misdemeanor may be refused licensure, as well as those disciplined on the license application about prior convictions, discipline, etc. Most states conduct background checks on a case-by-case basis and may take into consideration the seriousness of the offense and other factors in making the decision to grant or withhold licensure.
